PROFILE

An enthusiastic, hard-working, and organised full stack developer. I studied a Bachelor of Science (Enology and Viticulture) but have decided to step away from winemaking to follow my passion for software development; specifically in Blockchain technology. I am eager to use my skills to create useful and beautiful software. Whether making wine or coding an application, I am driven to create high quality products for people to enjoy.

SKILLS

- HTML5
- CSS3
- JavaScript ES6
- React
- Ruby on Rails
- Web Design
- FIGMA
- Wireframe Creation
- PostgreSQL
- Stimulus Framework
- APIs and Web-Scraping
- Database structuring and queries

EXPERIENCE

FREELANCE DEVELOPER

2022-Present

- Database administration and website design
- Built the logic for a web-app built to increase focus and work productivity of users.
- Using Figma and code, I turn ideas into reality by working with clients to create web applications.

PENFOLDS

Winemaker

2020-2022

- Oversaw production in a brand new, state of the art winery.
- Part of a leadership team that oversaw 100+ casual employees
- Heavily logistics based role. Determining the optimum movement and storage of high value product.
- Given the responsibility of co-creating a digital marketing campaign.

KALLESKE WINES

Sommelier/Cellar door assistant

2020

- I was given the responsibility of taking private tastings of groups ranging from 1 to 20 people.
- Represented Kalleske Wines at Cellar Door Festival, a weekend long event in the heart of Adelaide.
- During my time in cellar door I received multiple positive reviews across different platforms which I believe are attributed to my ability to talk to, and engage people in anything I am passionate about.

EDUCATION

LE WAGON BOOTCAMP

Ruby on Rails Fullstack

BACHELOR OF SCIENCE

Winemaking and Viticulture
University of Adelaide
